

The investment project realized has permitted the acquisition of innovative services which have led to:

1. Managing of the supply chain;
2. Obtaining of advanced certifications.

### **1. Managing of the supply chain**

Through this project, Lube srl has activated the procedures of monitoring and control its own supply chain in order to eliminate or decrease to the minimum the possible contamination tools of its products realized, representing in this way a guaranteed society for our client.

### **2. Obtaining of advanced certifications**

Through this project, the society has obtained the following steps of certification:

- OEKO TEX STeP certification;
- For the UNI EN ISO 14001:2015 System, the company has implemented all the documentation for the certification ISO:14001 from the moment that the OEKO-TEX STEP Standard contains all the requirements ISO:14001 and incorporates it.
- Furthermore, it has led to operate for the integration between the OEKO-TEX system, the existing social responsibility and the quality system.
